

Agogic ID (NFC tag)

You are not able to connect to your Agogic ID (NFC) ?

>Check that your mobile phone is compatible > next pages

We are compatible with almost phones.

> **If your phone is not compatible please download an NFC app**

(Appstore for Iphone, Google Play Store for Android, search for "NFC" and download a recent app).

- Your phone is compatible but you cannot connect ?

1 Check the NFC tag function is **active**

Iphone > Iphones activate NFC chip by default when you use it when activated

*Android> Settings > Wireless and Networks > Other or Additional settings
> switch NFC ON > restart*

2 Additional covers may limit NFC signal > remove the cover and retry

3 Turn flash light and camera off > restart and retry

*Some smartphones experience poor NFC functionality when the flash light or camera are on.
> turn off other applications > retry or restart*

4 Battery and power > charge your phone fully, retry during operation

*Some smartphones experience NFC bad functionality when it is below 75% charged
> turn off other applications, keep the phone charged > retry or restart*

- Still experiencing a problem? Send a mail to giuseppe@agogic.it with all details, we will take care of it

<p>* NFC Compatibility is only available on certain versions of this model. You should consult your owner's manual or contact the manufacturer.</p> <p>** iPhone 7 and later can read and write NFC Tags, but they must be upgraded to iOS 13.</p> <p>*** These devices must be updated to Android 8 in order to be compatible with MIFARE Classic® chips.</p> <p>**** OnePlus One's hardware is compatible with MIFARE Classic®. However, it must be updated to the last version of OmniROM/LineageOS.</p>
